Reliable technology for your home

www.zennio.com

What does reliable Technology mean for the home?

- Having control of household functions from a single system.
- Managing coordinately air conditioning, lighting, blinds, access and communication with them. (Video intercom).
- Monitoring your security and notify you any risks and alarms (Fire, flood, smoke, gas).
- Use your own mobile devices (tablets and smartphones) as remote controls inside and outside the home at no charge.

Which technology is behind?

- 1 Reliable, robust, wired and tested.
- 2 Certified with the international KNX standard.
- 3 It is pure present, technology available today.
- 4 It is affordable thanks to the large current volumen and growth experienced.

All your home control at your hands.

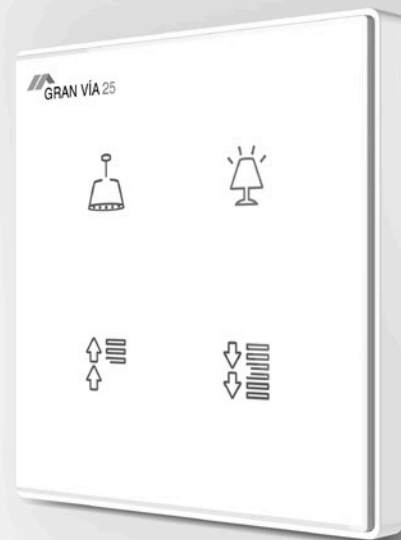

How does it contribute to enhance the environment and your economy?

- Reducing drastically power consumption until recovering the investment shortly.
- Improving home energy rating.
- It is scalable at any time, being able to conduct the installation in phased manner.

How does it look like aesthetically?

- Elegant, without switches or controls on the walls.
- A single device for everything: air conditioning, lighting, alarms, blinds, and so on.
- Touch screens and push buttons with smartphone touch technology and free configurable functions.
- Unique and bespoke panels design by the owner without any additional cost. Coherent aesthetic for all rooms and functions.
- Compatible with standard electrical equipments (sockets, switches, network sockets, telephone or TV).

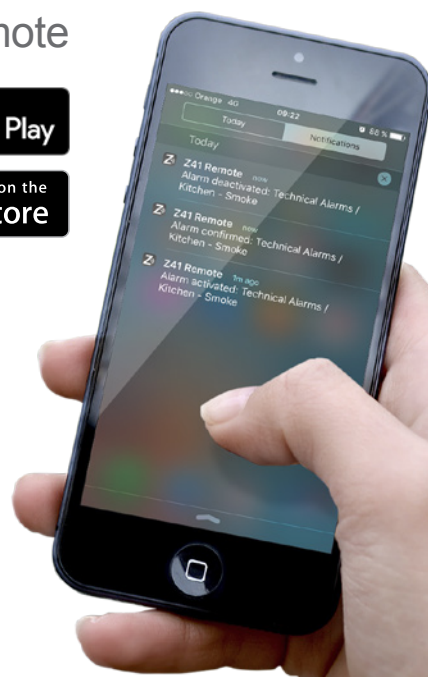

Why is it trustworthy?

Because Zennio:

- Designs, together with the owner and/or technicians, the control system for your project, and integrate all the necessary elements according to your specifications.
- Helps and supports the project installer responsible of the project implementation.
- Certifies the correct installation of the system.
- Preserves and has always available the documentation at owner disposal.
- Takes over guarantees, extensions and maintenance, exempting the developer once the installation is certified.
